

Tufts Career Center FAQ of the Week

Does my choice of major limit my career options?

We believe that major does not determine or limit your career options. Unless you are planning to enter a technical field, such as engineering or accounting, you can obtain the skills necessary to succeed through any of the [70+ majors offered at Tufts](#). We encourage students to study what they enjoy, assess their values, interests, and personality, and explore careers related to what they have learned about themselves. As you'll see from our [destination outcomes](#), Tufts alumni from all majors go on to a wide range of career paths.
